

June 15 Customer Acquisition Sprint

Question pressure-tested through the arsenal: *How do we get a paying customer by June 15, 2026 — 14 days from today, 10 days before seed close, 21 days before public launch?*

Why this matters disproportionately. A single signed paying customer before June 25 inverts the seed-close diligence narrative. The pitch stops being "founder with traction projections" and becomes "company with revenue + named reference." That's worth 30–50% on the seed post-money OR closes any wavering co-lead. The seed-restructure two-stage proposal (Jun 25 + Sep 30 tranche) becomes substantially easier to anchor at \$60M for the September tranche if there's one logo on the page by Jun 25.

This is also the answer to the playbook's #1 unmitigated risk (founder = SPOF) in disguise. A customer who signs before launch is a customer who is buying the FOUNDER personally — the founder is the brand, the protocol, and the Foundation in their head. That works at 14-day cadence in a way it does not work post-launch when 200 prospects are competing for the same calendar slots.

The doctrine for these 14 days

- 1. We sell what can be bought in 14 days, not the product the playbook contemplates for Day 60.** That means: not a 30-Day Pilot SOW with SOC 2 dependencies, not a Production-tier subscription with full SLA contract grade. We sell the *Founding Member* SKU.
- 2. We sell to founder-mode buyers, not procurement-gated ones.** Tier-1 EU bank GCs cannot move in 14 days — their procurement is 90–180 days minimum. The buyers who CAN move are: AI-native scaleup founders, media-company GCs under acute synthetic-media disclosure pressure, mid-market FSI with founder-mode CEOs, and AI-compliance partners (Credo AI, Holistic AI, Vanta) who can buy as a partnership rather than a vendor purchase.
- 3. The seed-investor portfolios are the highest-leverage pipeline source.** TVP, Stillmark, Fulgur, and Illuminate collectively have ~200 portfolio companies. ~25 of those use AI in production at scale. ~10 are EU-exposed for Article 50. The warm-intro path from a co-lead partner to a portfolio CEO is 1–3 emails and a 30-minute call, not a 14-day cold-outbound cycle.
- 4. The press moment at launch is the actual product being sold.** A company that signs by June 15 buys the launch press release. The customer's name + logo + a quote in coverage at FT, Politico EU, The Information, and the founder's letter — published July 6. That has a marketing budget value to the customer of \$50K–\$200K depending on how aggressively they value tier-1 trade press coverage. We're selling the press moment, not the SaaS.
- 5. Lock-in pricing is the second product.** The Founding Member rate gets locked for 36 months. Three years from now at full Production pricing, the customer who signed in June 2026 is paying 50% of what their peer who signed in 2027 is paying.

The Founding Member SKU (the only thing on sale through Jul 6)

Capped at 5 seats. First-come, first-served by signed agreement. Hard close June 15 — no Founding Member status sold after that date, even at higher prices.

Tier	Price	What's included	Hard cap
Founding Member — Standard	\$25,000 / year × 3 years locked + warrant equivalent to 0.10% of LedgerProof Inc. fully-diluted (4-year vest, 1-year cliff)	Production protocol access (LPR v1.1+), up to 1M receipts/month, Audit-Ready Compliance Stamp PDF, Foundation Advisory Council seat for one named executive, public reference rights at July 6 launch (logo + quote in press release), priority access to founder's calendar (one in-person customer event per year, 24h response SLA on Foundation matters), 36-month price lock at \$25K	5 seats
Founding Member — Anchor	\$50,000 / year × 3 years locked + warrant equivalent to 0.25% of LedgerProof Inc. fully-diluted	Everything above + 10M receipts/month + co-authored published case study within Q3 + named seat on Foundation Technical Steering Committee Customer Advisory Board (separate from the TSC itself) + co-marketing rights	2 of the 5

What is NOT included: SLA contractual penalties (we publish soft 1h / hard 24h SLO publicly; we don't yet contract to penalties), dedicated support engineer, custom integrations, indemnification beyond standard liability cap. These come in later tiers once SOC 2 Type 1 lands at Day 90.

What we contract to: - LPR v1.1 protocol access from contract signing - Audit-Ready Compliance Stamp PDF generation by Day 30 - Best-efforts soft SLO (1h commit / 24h anchor confirmation) - Foundation Advisory Council seat (commencing on Foundation determination letter receipt; up to 6 months from now) - Public reference rights tied to launch and press window - Price lock of \$25K/year (Standard) or \$50K/year (Anchor) for 36 months

The legal vehicle. A single 4-page Founding Member Agreement (NOT the 30-Day Pilot SOW). Drafted by Cooley Jodie Bourdet within 48 hours. Designed to clear customer legal in 3 business days at a founder-mode shop, 5–7 days at a mid-market FSI. NOT designed to clear procurement at a Tier-1 EU bank.

The 14-day critical path

Date	Action	Owner
Mon Jun 1 EOD	Send co-lead warm-intro requests to TVP, Stillmark, Fulgur, Illuminate asking each for 3-5 named portfolio CEOs/founders who use AI at production scale + at least 1 with EU exposure	Veronica
Tue Jun 2 EOD	Founding Member Agreement template drafted by Cooley	Cooley
Tue Jun 2 EOD	First-tier cold-outbound to 8 AI-native EU scaleups (Mistral, Aleph Alpha, Stability AI, Synthesia, ElevenLabs, AI21, AssemblyAI, Hugging Face) — founder-to-founder cold	Veronica
Wed Jun 3 EOD	Warm intros arrive from co-leads; first 3-5 candidate calls booked	Veronica + AE bridge contractor
Thu Jun 4–Fri Jun 5	First-call diligence sessions; Founding Member terms walked through; first 1-2 candidates request the agreement	Veronica + Cooley
Mon Jun 8–Wed Jun 10	Customer legal review at 2-3 candidates; founder available for clarification calls	Veronica + Cooley + customer counsel
Thu Jun 11–Sat Jun 13	Final negotiation; warrant agreement attached; founder + customer CFO sign	Veronica + customer
Sun Jun 14–Mon Jun 15	First 1-2 wires execute	Customer + Veronica
Mon Jun 15 EOD	TARGET: 1-2 signed Founding Member Agreements, \$25K-\$100K total ARR booked	—
Tue Jun 16	Press release draft updated to include customer names; sent to Brunswick Group (PR firm) for July 6 launch coordination	Veronica + Brunswick

If even ONE signs by Jun 15, the seed-restructure conversation Jun 17-25 inverts.

The 4 buyer archetypes that can move in 14 days

Archetype A — AI-native EU scaleup founder

Why they can move: Founder-mode decision-making intact. Article 50 is their #1 regulatory concern. Press at launch buys them seed-funded credibility they can use in their own Series A/B conversations.

The pitch in one sentence: "We're announcing on July 6 with a signed founding member from European AI; you join us on the press release at \$25K with 36-month price lock — or your competitor does."

Specific candidates: - **Mistral AI** — Paris, EU compliance is acute, founder-mode active. Arthur Mensch. - **Aleph Alpha** — Heidelberg, EU-sovereignty-positioned, deep ties to German Tier-1 enterprise. Jonas Andrulis. - **Synthesia** — London, AI video generation, Article 50(2) synthetic media exposure is acute. Victor Riparbelli. - **ElevenLabs** — London, AI voice generation, also Article 50(2) acute. Mati Staniszewski. - **Stability AI** — London, image generation, post-restructuring, may need a press moment. Prem Akkaraju. - **AI21 Labs** — Tel Aviv, EU-exposed via enterprise customers, model card / receipt story resonant. Ori Goshen. - **AssemblyAI** — SF, EU enterprise customers, transcription as Article 50(4) text-generation exposure. Dylan Fox. - **Hugging Face** — Paris, the obvious cultural fit; possibly already aligned philosophically; possibly even a Foundation-level alignment partner. Clem Delangue, Julien Chaumond.

Archetype B — EU media company GC under acute synthetic-media pressure

Why they can move: Article 50(2) and 50(4) are existential. Recent deepfake incidents have made the disclosure obligation board-level. Foundation Advisory Council seat is a career artifact the GC can defend in any future investigation.

The pitch in one sentence: "Your CEO will be asked on August 3 why your group hasn't disclosed synthetic-media usage; we ship the receipt that answers that question; sign by June 15 and we name you in the July 6 launch."

Specific candidates: - **Sky Group** (UK/IT — Comcast subsidiary). Recent synthetic-media incidents in their content pipeline. GC: TBD. - **RTL Group** (Luxembourg). Cross-border media; high Article 50 exposure. GC: TBD. - **Mediaset** (Italy). Berlusconi family, recent AI integration, willing to move. GC: TBD. - **ProSiebenSat.1** (Germany). Mid-market broadcaster, founder-mode CFO. GC: TBD. - **Le Monde** (France). Long-form publisher, AI-aware, prestige-sensitive. GC: TBD. - **Schibsted** (Norway). Nordic media group, progressive on tech governance. GC: TBD.

Archetype C — Mid-market FSI with founder-mode decision-making

Why they can move: Procurement is still founder-controlled. CEO sees Article 50 as a competitive differentiator vs. the slower Tier-1 banks. AI is already in production (customer service, KYC, robo-advisory).

The pitch in one sentence: "Your large competitors will spend nine months getting Article 50 compliant; you ship it in two weeks and tell your customers that on July 6."

Specific candidates: - **Revolut** (UK). AI in customer service + risk. CFO/Compliance Chief: Mikko Salovaara. - **N26** (Germany). Heavy AI customer service. CEO: Valentin Stalf. - **Wise** (UK). AI in transaction monitoring. CEO/CFO: Kristo Käärmann / Matt Briers. - **Klarna** (Sweden). Heavy AI customer service (AI-powered support is publicly advertised). CEO: Sebastian Siemiatkowski. - **Adyen** (Netherlands). AI in fraud detection. CEO: Pieter van der Does. - **GoCardless** (UK). AI in payment optimization. CEO: Hiroki Takeuchi. - **Curve** (UK). Founder-led, AI-native. CEO: Shachar Bialick. - **Bunq** (Netherlands). Founder-led, vocal on European tech sovereignty. CEO: Ali Niknam.

Archetype D — AI-compliance vendor / partnership-as-purchase

Why they can move: They aren't customers; they're partners. Their version of "buying" looks like an integration partnership announcement with a financial commitment (\$25K equivalent in joint marketing investment, or a small annual partnership fee).

The pitch in one sentence: "Embed LPR receipts in your AI governance platform as the verifiable evidence layer; we list you as a launch partner on July 6 and you get the Foundation Council seat that maps to your customer base."

Specific candidates: - **Credo AI** (US, Series A). AI governance platform; receipts would slot in as the evidence layer. CEO: Navrina Singh. - **Holistic AI** (London). AI risk + governance; UK-funded. CEO: Adriano Koshiyama. - **Vanta** (US). Compliance automation; could position LPR as the AI-specific layer. CEO: Christina Cacioppo. - **Drata** (US). Compliance automation; similar to Vanta. CEO: Adam Markowitz. - **Anthropic** (US). Constitutional AI + safety positioning; might fund LPR as a public-goods complement to their own work. Daniela Amodei. - **OpenAI** (US). Similar logic but slower-moving on partnerships of this kind.

Co-lead warm-intro request template

To: **TVP partner, Stillmark partner, Fulgur partner, Mark Beeston (Illuminate)** — sent as four separate emails Monday Jun 1 EOD.

Subject: One ask before close — warm intros to 3-5 portfolio AI users

[Partner first name],

One concrete ask before we close. I am running a 14-day customer sprint targeting 1-2 signed Founding Member agreements by June 15 — ten days before our nominal seed close, three weeks before public launch.

The economics: a single signed customer by Jun 25 inverts the diligence narrative for the seed-restructure conversation (and meaningfully strengthens the case for the September tranche valuation). I want to walk into that conversation with at least one named logo, not projected pipeline.

The Founding Member SKU is purpose-built for this 14-day window: \$25K/year × 3 years locked, 1M receipts/month, Foundation Advisory Council seat, public reference rights at July 6 launch, warrant equivalent to 0.10% fully-diluted. Capped at 5 seats; closes June 15.

The buyers who can move on this timeline are founder-mode AI users and mid-market FSI — not Tier-1 banks. **In your portfolio, who fits any of these?**

- AI-native scaleups with EU exposure who would value being named in the LedgerProof launch press release
- Mid-market FSI (banks, insurers, fintechs) with founder-mode CEO/CFO decision-making
- Media companies with acute synthetic-media disclosure pressure under Article 50(2)
- AI-compliance / governance platform companies who could position LPR as their evidence layer

I am looking for 3-5 named introductions from your portfolio. Warm intro via your standard channel; I will take it from there.

If you have 30 minutes Tuesday or Wednesday this week to walk through the portfolio together, I will fly to where you are or take it on Zoom — whichever you prefer.

Best, Veronica

Three cold-outbound variants for archetype A (AI-native EU scaleup founders)

Sent Tuesday Jun 2 — founder-to-founder cold, NOT from `lpr-gtm` outbound queue (these are too personal for automated outbound).

Variant A1 — Mistral / Aleph Alpha / Hugging Face frame (philosophical alignment)

Subject: Co-launch July 6 — Article 50 receipts as the open layer European AI needs

[Founder first name],

You and I are building two pieces of the same thing. You are building European AI; I am building the open cryptographic evidence layer that proves it complies with Article 50 — without any of us having to trust a vendor.

LedgerProof Protocol is live in production since May 18. IETF Internet-Draft confirmed. ~50,000 receipts anchored to Bitcoin. The Foundation is forming as a US 501(c)(3) with Swiss Verein and Singapore non-profit twins; counsel is Adler & Colvin. Public launch July 6. EU AI Act Article 50 enforcement August 2.

I am putting together a Founding Member cohort for the July 6 launch — capped at 5 companies, hard close June 15. Founding Members get: production protocol access, Foundation Advisory Council seat (one named executive), public reference at launch, and 36 months of price-locked subscription at \$25K/year. Plus a warrant in LedgerProof Inc. equivalent to 0.10% fully-diluted.

The argument I am making: the European AI story needs a European-presence open protocol for compliance evidence. A Mistral / Aleph Alpha / [your company] commitment alongside our Foundation launch

announcement makes that argument credible in a way no other arrangement does.

20 minutes this week? I can come to Paris / Heidelberg / [your city] Wednesday or Thursday. Or Zoom — your preference.

Verifier (10-second proof we are real): <https://verify.ledgerproofhq.io/r/founding-declaration>

Best, Veronica S. Dawkins Founder, LedgerProof Foundation veronica@ledgerproofhq.io

Variant A2 — Synthesia / ElevenLabs / Stability frame (synthetic-media acute exposure)

Subject: Article 50(2) deadline + your launch press opportunity

[Founder first name],

You have ~62 days until EU AI Act Article 50(2) starts being enforced on synthetic-media disclosure. Your customers' GCs are already asking your team how to evidence that obligation. You either build the evidence layer yourself or you adopt an open one.

LedgerProof is the open protocol — IETF Internet-Draft confirmed, Foundation 501(c)(3) in formation, ~50,000 receipts already anchored to Bitcoin, live in production since May 18. Public launch July 6.

I am closing a Founding Member cohort by June 15 — five companies, \$25K/year × 3 years locked, Foundation Advisory Council seat, named in the July 6 launch press release. The synthetic-media space has space for one or two of the five. [Your company] is the obvious fit.

I can show you the SDK quickstart, the verifier demo, and the Founding Member agreement in 20 minutes. Wednesday or Thursday this week. Where are you?

Verifier (10-second proof): <https://verify.ledgerproofhq.io/r/founding-declaration>

Best, Veronica S. Dawkins Founder, LedgerProof Foundation

Variant A3 — Hugging Face frame (alignment partnership)

Subject: Possible alignment partnership before July 6 launch

[Founder first name — Clem / Julien],

LedgerProof is the open IETF-tracked cryptographic protocol for EU AI Act Article 50 evidence. Live in production since May 18. Foundation 501(c)(3) in formation; Adler & Colvin counsel. Public launch July 6.

I think there is an alignment partnership worth discussing between LedgerProof Foundation and Hugging Face — specifically: every model card on the Hub could expose a LedgerProof receipt for its training-data provenance and evaluation history, with the receipt verifiable at verify.ledgerproofhq.io. The protocol is open; the Foundation governs it; no Hugging Face dependency on LedgerProof Inc. specifically.

If this resonates philosophically, I would love to discuss what a launch-partner announcement would look like for July 6. The conversation does not have to be commercial in the traditional sense — but it does need to land before June 15 if it is going to be part of the launch.

20 minutes this week? Paris or Zoom.

Verifier: <https://verify.ledgerproofhq.io/r/founding-declaration> IETF draft:

<https://datatracker.ietf.org/doc/draft-dawkins-scitt-ai-article50/>

Best, Veronica

Three cold-outbound variants for archetype C (mid-market FSI)

Variant C1 — Revolut / N26 / Wise frame (CFO/CCO directly)

Subject: Article 50 ships in 14 days at [Company]. Founding Member cohort closes June 15.

[CFO/CCO first name],

You have AI in production at scale — customer service, KYC, transaction monitoring. EU AI Act Article 50 enforces August 2; your Tier-1 bank competitors will spend nine months going through procurement to address it. You can ship it in two weeks and turn that into a competitive press moment.

LedgerProof is the open cryptographic protocol that gives you regulator-verifiable receipts for every AI-touched decision. Live in production since May 18; IETF-tracked; Foundation-governed. Public launch July 6.

I am closing a Founding Member cohort by June 15 — five companies, \$25K/year × 3 years locked, Foundation Advisory Council seat for your Chief Compliance Officer, named in the July 6 launch press release. The fintech category has space for 1-2 of the 5; [Revolut/N26/Wise] is the obvious fit.

The integration is a Python or TypeScript SDK wrapping your model outputs; latency overhead under 50 ms at the 99th percentile; we contract to that. By Day 30 of the engagement, you have an Audit-Ready Compliance Stamp PDF your Chief Compliance Officer can hand to the FCA / BaFin / DNB.

20 minutes this week? London / Berlin / Amsterdam — I can be there.

Verifier: <https://verify.ledgerproofhq.io/r/founding-declaration>

Best, Veronica S. Dawkins Founder, LedgerProof Foundation

Decision principles for the 14-day sprint

1. **No discount below \$25K Founding Member Standard.** If a candidate counters with "we'll do \$10K," the answer is no. The Founding Member tier is a scarcity SKU. Discounting it destroys the scarcity narrative for the next four candidates.
2. **No deferring the Foundation Advisory Council seat assignment.** The candidate names the executive at signing. If they cannot agree internally on which executive gets the seat, they are not founder-mode enough to close in 14 days; pass.
3. **Founder available for ANY customer call within 24 hours during the sprint window.** This includes Saturday and Sunday Jun 6-7, Jun 13-14. Calendar is open. If we are not willing to weekend-call to close a Founding Member, we are not actually committed to the Jun 15 target.
4. **Public reference rights are non-negotiable.** Every Founding Member signs to be named in the July 6 launch press release with logo + quote + reference rights. A Founding Member who insists on remaining anonymous is buying the wrong product; pass.
5. **The agreement is 4 pages or it is not the right document.** If Cooley's Founding Member Agreement comes back at 8+ pages, push back. The buyer's legal review needs to clear in 3-5 days, not 14. Friction kills 14-day sales cycles.
6. **The warrant is not the load-bearing piece. The press is.** Customers are not signing for the 0.10% warrant. They are signing for the press moment and the Advisory Council seat. The warrant is a sweetener to align long-term interest, not the dealmaker.

What this changes about the Trail of Bits + seed restructure conversations

If one Founding Member signs by Jun 15: - The seed restructure note to co-leads gets rewritten with "as of [date], [Customer] is the first Founding Member" as the lede - The Trail of Bits engagement memo gets named-customer references (with customer permission) - The Series A diligence pack starts with a logo, not a roadmap

If two Founding Members sign by Jun 15: - The seed restructure note becomes a one-paragraph cover note attached to the customer announcement - The press release at Jul 6 becomes a category-defining moment, not a launch - The Big-4 Working Group invitations land with two named-customer attachments

If three Founding Members sign by Jun 15: - We close the seed at \$50M post, not \$45M - We open conversations with two more co-lead VCs for additional capacity - We accelerate the Series A timeline from December to October

The June 15 customer sprint — three things to ship by EOD Monday Jun 1

1. **Co-lead warm-intro request emails sent** (four parallel emails — TVP, Stillmark, Fulgur, Beeston)
2. **First 8 cold-outbound emails to archetype A drafted** (use the templates above; personalize each to the founder)
3. **Cooley engaged** to draft the Founding Member Agreement template; 48-hour turnaround

By Wednesday EOD: 5+ first calls booked. By Friday EOD: 2-3 agreements requested. By Jun 15 EOD: 1-2 signed.

The math says this is doable. The doctrine says we should run it. The doctrine also says: if it does NOT work, the seed-restructure conversation reverts to the originally-drafted single-tranche \$15M close — no harm done.

Document boundary: This document is internal strategic planning material for LedgerProof Foundation (501(c)(3) in formation, Delaware) and LedgerProof Inc. (Delaware C-corp). It contains assumptions, forecasts, and decisions that may change as conditions evolve. Numbers labeled BASE / STRETCH / DOWNSIDE are scenarios, not forecasts. Distribution is limited to Foundation board, Inc. officers, and named diligence counterparties under NDA or equivalent.

Confidentiality: Do not redistribute without consent of the founder. Bitcoin-anchored governance receipts apply only to ratified Foundation actions; this document is a planning artifact and is NOT receipt-anchored.
